

**An Unusual case of Huge Fibroid Uterus at N M Virani**  
**Wockhardt Hospitals,Rajkot**  
**Happiness in Life came back to the Family.....**

Most of the time we do not give due importance to our health & our small casualness gets converted into chronic health problems. Such a case was treated at N M Virani Wockhardt Hospital, Rajkot. A **42 years** lady from **Mithapur** presented with irregular heavy mensuration periods, discharge from vagina, pain abdomen, heaviness in lower abdomen & chronic anemia.

She was investigated & in ultrasound it was found a huge fibroid (benign tumor) of uterus. Further in CT investigation, the finding was a large tumor growing posterior wall of uterus & was also compressing adjoining organs of lower abdomen. The tumor over the period of time attained the size of full term pregnancy.

On clinical examination, it was not possible to feel the normal anatomy of her genital organs. The tumor was also protruding out of the cervix into the vagina. Her presentation was an indication of typical ignorance of earlier signs & symptoms of her present health condition; at times this is risky & dangerous for the patient's life. The competent doctors at Wockhardt took it as a challenge. The lady was operated for almost **two hours & the 8 Kg of tumor** was taken out of the body. In biopsy report it was confirmed that it was a **fibroid uterus**.

The treating Gynecologist **Dr. Ruby Gupta** & assisting surgeon **Dr. Rajan Jagad** stated that such conditions could have been avoided if regular Whole Body HealthCheck ups are done at least once in a year. This lady has returned home happily & her husband stated that N M Virani Wockhardt hospital has added quality & happiness in their family life.

**N. M. VIRANI WOCKHARDT HOSPITAL, KALAWAD ROAD, RAJKOT – 360007.**
