

## Second Inning of life started at 105\* Patient who lost his Mobility from several years started walking after 4 Hours of Surgery.....

The hope of living healthy life continuously decreases as the age of Individual grows. The case which we are going to discuss is bit unusual but shows the true spirit of living life healthily and without Age barriers. This is one of the outstanding case done at the N.M.Virani Wockhardt Hospital ,Rajkot.

The Patient Named Sayedpir Rokadiyabapu Dolti, 105 yrs, Priest in one Mosque was suffered from spine problems from several years. and with time due to Spine Problem he lost his Mobility.

He was refused for surgery from many Hospitals because of Age related Risk of Anesthesia & Nature of Surgery.

At N.M.Virani Wockhardt Hospital, Rajkot Dr. Niraj Vasavada, Consultant Spine Surgeon has taken this opportunity as a challenge and decided to perform the surgery keeping in mind all age related risk. Finally Surgery was performed. Surgery was Minimally Invasive

Spine Surgery with the help of Operating Microscope to minimize the risk of Conventional Surgery, Because of MISS the Risk Associated with Age & Anesthesia was also Minimized.

After 4 hours of Post Surgery Patient has started to walk without any support. and on very next day after surgery he was discharged without any pain or complains. He was back on his Routine life in just 10 Days after the Surgery.
