

### **Health talk on Osteoporosis**

A health talk on 'Oesteoporosis' will be organized by Wockhardt Hospitals on 16<sup>th</sup> October, 2011 at Arvindbhai Maniyar Hall, Jublee Garden, Rajkot.

Osteoporosis is a disease in which thinning of bone tissue and loss of bone mass occurs. It occurs more commonly in older aged people above the age of 50. Patients suffering from osteoporosis are at a higher risk of suffering from fracture, as their bones are thinner and fragile and a fall from even a small height can lead to serious fractures.

Dr. Neeraj Vasavada, Consultant Spine Surgeon and Dr. Rupesh Mehta, Consultant Joint Replacement Surgeon from Wockhardt Hospitals will speak about Osteoporosis, its risks and possible treatments. Both speakers are renowned surgeons and their association with Wockhardt adds further strength to an existent strong team allowing Wockhardt Hospitals to provide premium specialized services for the patients.

The talk will be followed by a BMD test (Bone Mineral Density test) as a preventive measure that can help determine the level of calcium in the body.

Bone & Joint Program at Wockhardt Hospitals is one of the core specialties with a strong base of medical professionals and well-equipped facilities.
